Agenda

No battle plan survives contact with the enemy

WHAT IF?

New User What Ifs:

- A user with the same name exists
- Someone passes an invalid value
- We are out of license keys
- There is a solar flare, and it causes a bitflip and my call fails

API Call What Ifs:

- There is paging
- I get throttled
- My access token expires
- I'm a little teapot

File Transfer What Ifs:

- A duplicate file name exists
- Is it the same file or just the same name
- Destination is unreachable
- I need to add a new source
- The cloud is full

THANK YOU
